

Empowering Financial Supply Chain Management with Verifiable Trust

The Team

Lingraj Mahanand

Founder

15 years of IT experience in Software Development at Barclays, BNY Mellon, HSBC and fintech startups Streams, ZEFI and Herdus.

Harshit H Jain

Director and Chief Mentor, M.Sc. (Tech) Computer Science from BITS Pilani and MBA from IIM Ahmedabad

Harshit has over 30 Years of experience in setting up GTS businesses for Banks/NBFCs/IT companies

Backed & Supported By

A CoE in Blockchain Technology by

Partner

Raised : **INR 58 Lakhs** angel funding from Padup Ventures & Vinnars in 2023

Winner : **USD 3000** in XDC Blockchain Global Hackathon in 2023

Winner: **TDefi BizThon GITEX Dubai Web3 Hackathon** in Jan 2022

Selected amongst the 10 fintech startups in **SPJIMR FinNovate Accelerator Program** in July 2023

Trade Finance Gap: A Growing Challenge

A recent ADB* study estimated that the gap in MSME supply chain finance availability reached \$2 trillion.

**A \$2 Trillion Global
Opportunity**

**A \$48 Billion India
Opportunity**

Unveiling the technology challenges behind the \$2T Gap

Limited Adoption of Digital Trade Practices

- SMEs and emerging markets facing barriers to adoption due to the lack of an enabling policy environment.
- Multiple digital trade practices and standards, and limited data sharing culture.

Complexities of End-to-End Digitalization

- High number of parties involved in data exchange along trade processes, making comprehensive digitalization challenging.
- Balancing the retention of conventional business processes with the goal of reducing friction and duplication of data flow across entities and jurisdictions.

Data Fragmentation and Interoperability

- Trade transactions involving multiple participants and roles result in fragmented data stored in separate systems.
- Lack of alignment to available data standards and difficulty in transitioning data between systems, often relying on paper documentation or electronic substitutes.

Trust and Security

- Establishing trust boundaries in data supply chains to ensure secure transmission and transitive trust.
- Replacing traditional trust mechanisms, such as ink-signed paper, with secure digital solutions to achieve trust, traceability, and anti-fraud capabilities.

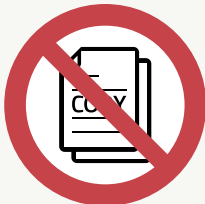

A blockchain-based IT infrastructure, incorporating common standards and best practices, aims to ensure that every digital interaction within financial supply chain management transactions in trade finance becomes verifiable, non-repudiable, retro traceable, and auditable for any necessary retention period.

BUSINESS FEATURES

+  Invoice discounting & Export Factoring (with PEPPOL standard eInvoicing)

+  Fully digital standardised SCF business workflow harmonising ICC's DSI* along with MLETR Compliant

+  Deduplication of invoices and negotiable instruments

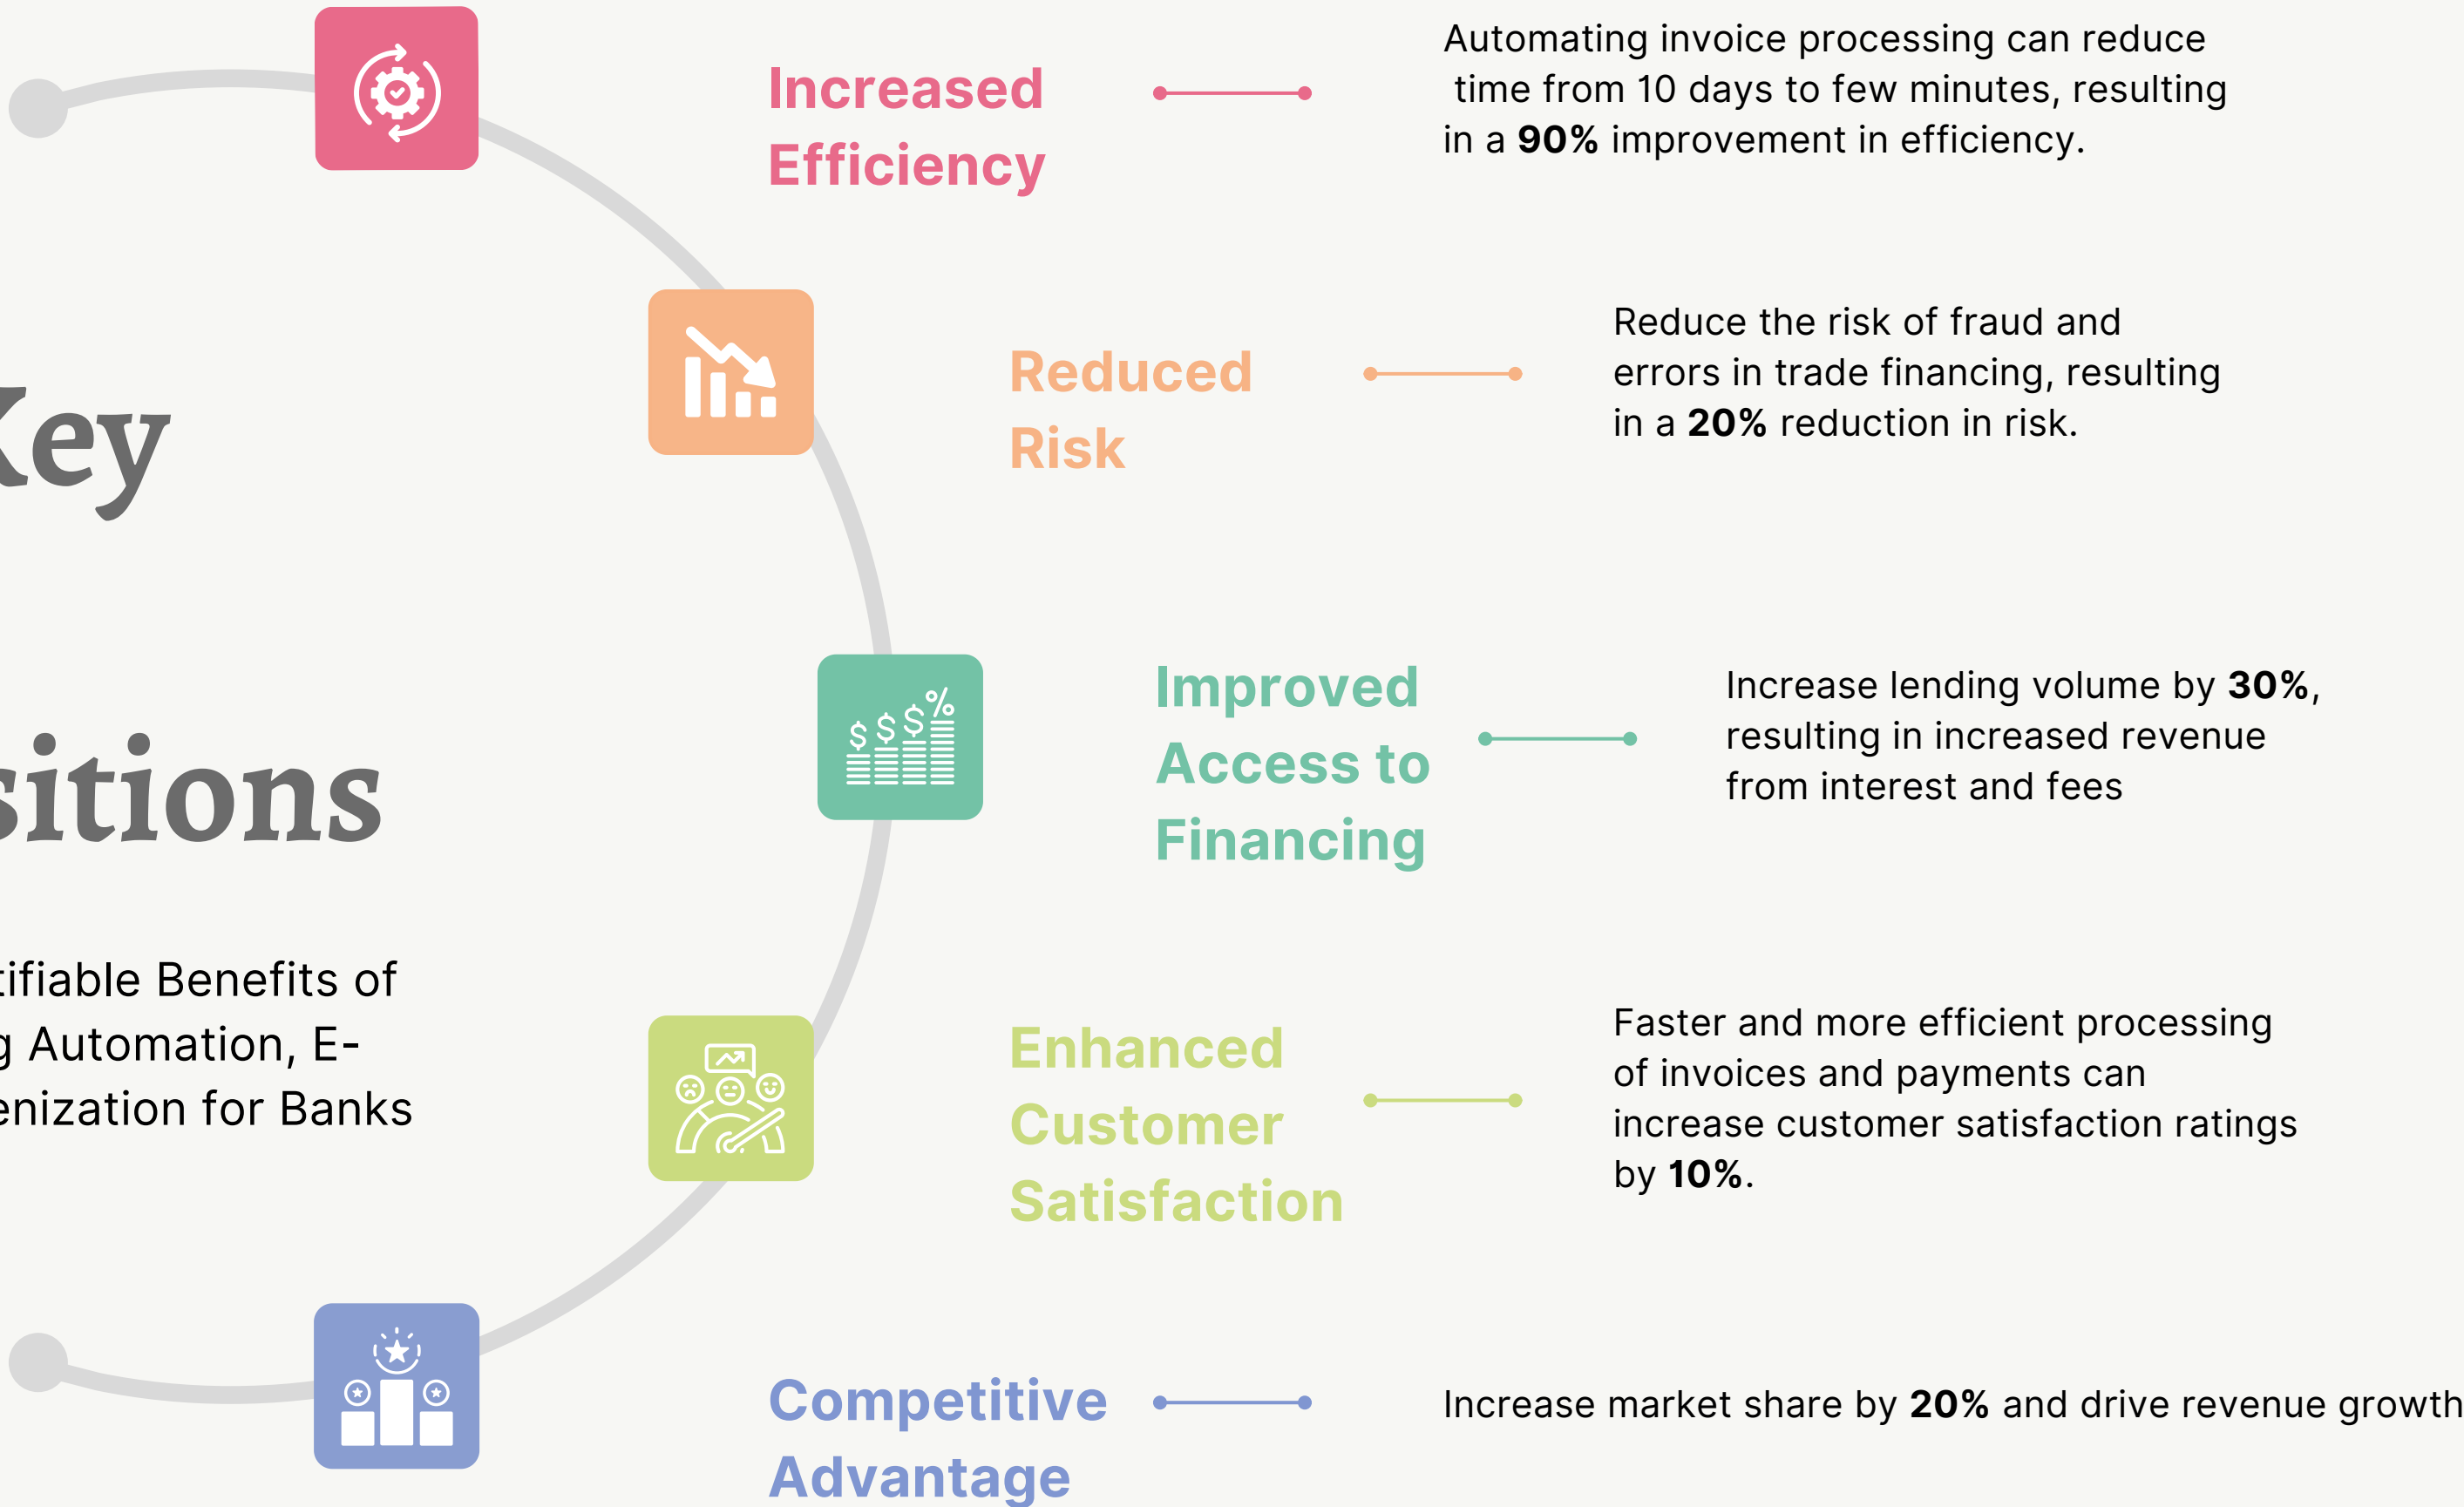

+  Seamless on-boarding, KYC and KYB using Global Legal Entity Identifier

Unlocking the Benefits: How Invoice Discounting Automation, E-Invoicing, and Tokenization Can Revolutionize Banking

The 5 Key Value Propositions

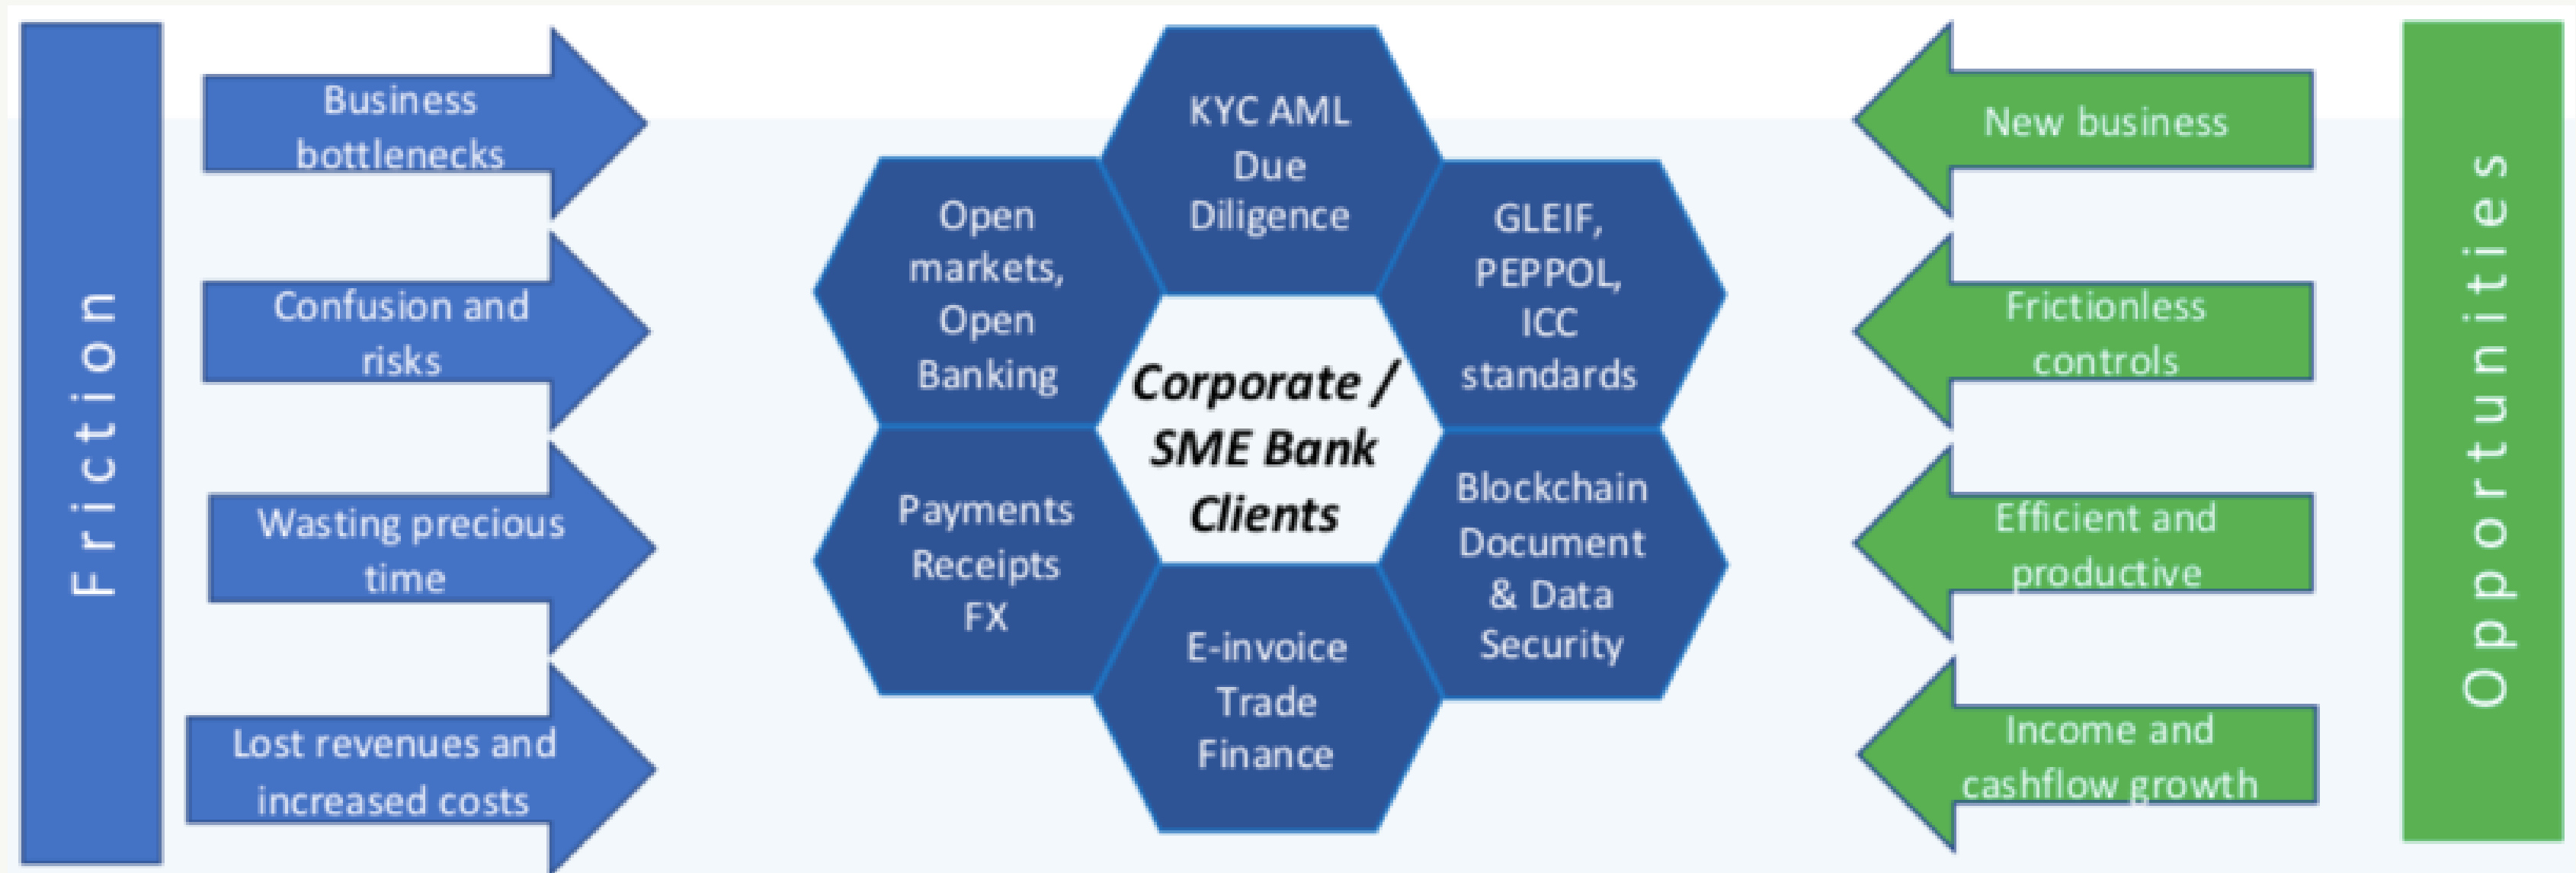

Discover the Quantifiable Benefits of Invoice Discounting Automation, E-Invoicing, and Tokenization for Banks

Value Proposition: Turning friction into opportunities

Leveraging on regulations, technology and international data standards

Expertise, experience
& benefits realisation

Streamlined Document &
Invoice Processing

Export Factoring with
Invoice Tokenization

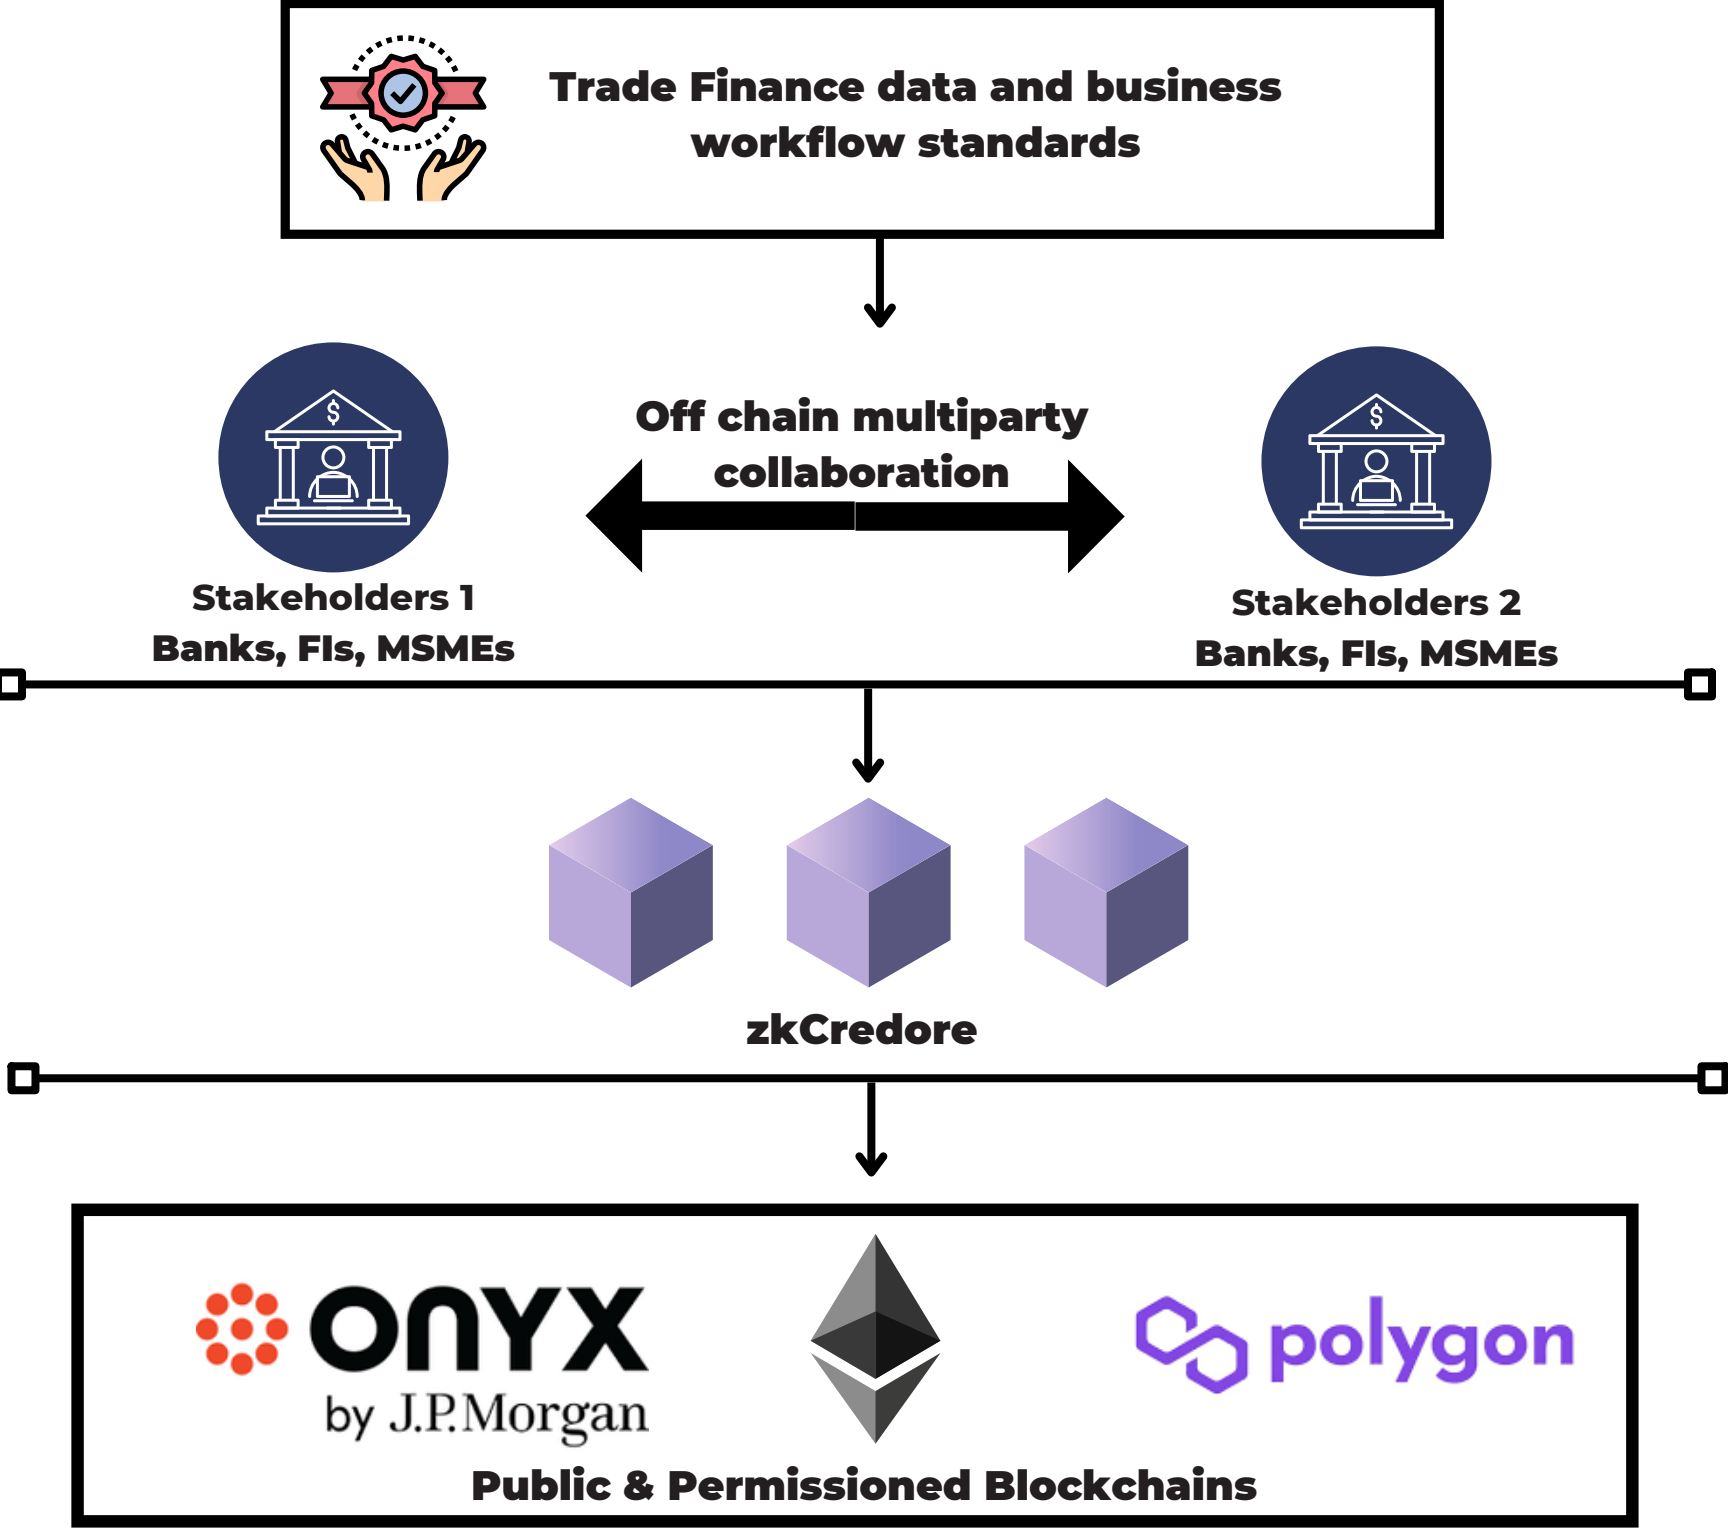

Deep tech IT engineering and
consulting with global presence

Project delivery, committed
to benefits realization

How Credore Infrastructure Works?

1. Common repository of standardised data and business workflow formats to facilitate data sharing, reporting, due diligence and compliance requirements
2. Off chain exchange of standardised sensitive data and business logic execution between multiple stakeholders.
3. zkCredore generates zero knowledge proofs against private data and private business logic.
4. Verifier in the blockchain verifies the correctness of off chain execution without private data and business logic.

FI: Financial Institution
MSME: Micro, Small and Medium Enterprises

Competitive Analysis

Factors	Credore	MonetaGo	TradeShift	Enigio
Duplicate Financing Prevention	✓	✓	✗	✓
Tamper Detection	✓	✓	✗	✓
Document Authentication	✓	✓	✗	✓
Audit Trail	✓	✗	✗	✓
Export Factoring	✓	✗	✓	✗
MLETR* Compliance	✓	✗	✗	✓
Eliminate Reconciliation, Unify Systems	✓	✗	✗	✗

MLETR*: Model Law on Electronic Transferable Records

Revenue Model

Negotiable Document Creation: **USD 10 per document**

Factor Companies: **30% of total interest levied to borrowers**

Additional User in Dedicated Node (SaaS)*: **USD 25 per month**

Additional User in Dedicated Node (On Premise)**: **USD 10 per month**

Dedicated Node (SaaS)*: **USD 1500 per month**

Dedicated Node (On Premise)**: **USD 1250 per month**

Implementation support: **USD 100 per hour**

Customer caused corrective actions: **USD 100 per hour**

* : Dedicated infrastructure and node in Cloud. Managed and operated by Credore.

** : Complete control and operation of own environment by Customer.

Go To Market Strategy

- Establish strong foothold in initial market
- Initial focus on invoice discounting and export factoring
- Strategic partnership with lenders, arrangers & financial institutions
- Establish partnerships through Government Of India sponsored exhibitions

Financials and Cash Flow

	Year 1	Year 2	Year 3
Gross Revenue	83 Lakh	5.1 Cr	22 Cr
Gross Margin	78 Lakh	4.9 Cr	21.6 Cr
Gross Margin %	67%	96%	98%
Indirect Cost	94 Lakh	1.8 Cr	3.9 Cr
Net Margin	(87 Lakh)	80 Lakh	17 Cr
Cash Flow	(87 Lakh)	1.9 Cr	19 Cr

Peak Cash Gap: USD 300K in 18th month

Note: Figures are shown in INR

POC Insights

- **Financiers:** Console Freight and Originate Capital
- **Invoice Size:** 130K USD
- **Exporter** – Sigma Foods
- **Importer** – Anantha USA LLC
- **Product** – Frozen Shrimps

Pilot & Acquisition Pipeline

- ICC India and FICCI
- Aditya Birla Group
- IBBIC
- ICICI Bank
- Trade Finance Investors of XDC Network

Roadmap

- Team Formation
- STPI incubation
- Idea validation
- POC Development

2021

2022

- POC Launch
- Execution of export finance deals on POC
- Rebrand to Credore
- Design of Protocol in line with ICC DSI

- Strategic Partnerships for MVP
- Development of BAFT DLPC and Rulebook
- Design LEI and eInvoice Integration

Q1 2023

Q2 2023 & Beyond

- On board factoring houses, exporters and banks
- Launch of Open Accounts MVP
- Expansion in APAC region
