Making Gynecology accessible with tech
for women from small towns

Women's Gynecology Challenges

Current Experience*

Awareness
around
Gynecology

Access to
Specialists

Traditional
Social/Family
Setup

No Support
Mechanism

Limited Financial
Independence

Outstation travel

Mrs. Sandeep Kaur, Age 32, Mother, Sunam, Middle Class

No support system

Gynecologist
access

- 76% women don't have access to quality healthcare

Substandard
treatment

- 67% cases unsafe abortion

Poor
Awareness

- Well being & health

Problem

***Lack of support system to access gynecological healthcare
due to social stigma in non-tier 1 cities
leads to large number of women falling prey to unethical medical practices
preventing better medical outcomes like low mortality & morbidity rates***

Findings

We spoke to women in small towns

25- 45 y/o are the most affected

- Have money to spend
- Have access to smartphones

Yet

- Poor Access to any support
- Low awareness
- Family & Social complications

All India market

We start in Tri City/Patiala District

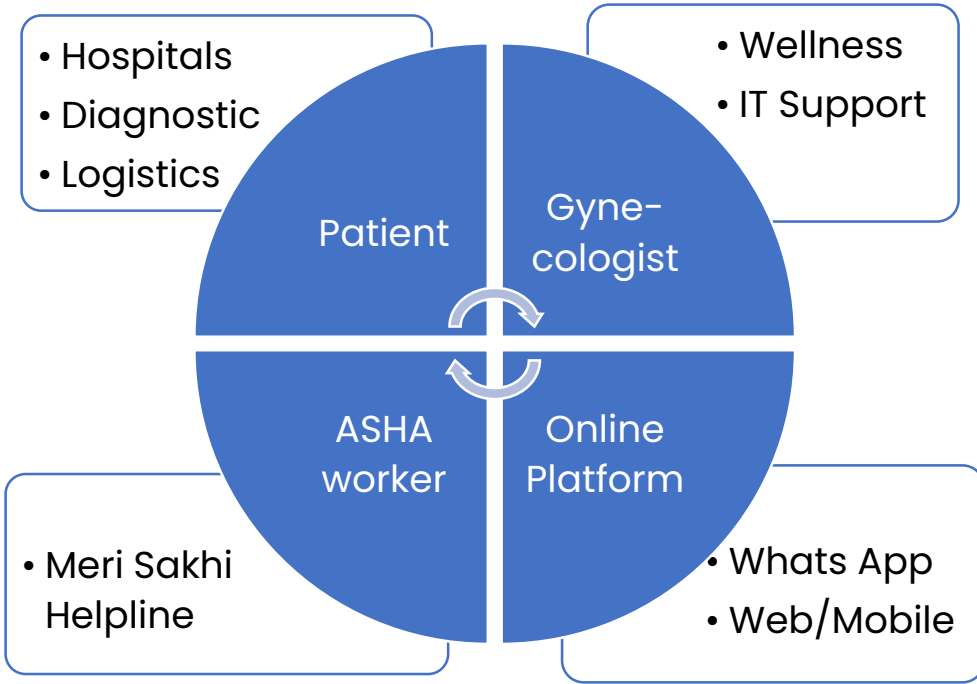

Solution

One stop phygital platform to provide on- demand, discrete Gynecology consultation, related services & well being services to women in tier 2/3 cities through a curated network of partners.
